ABOUT META-FUND.IO

Crowdfunding platform through NFTs **that rewards you**

For several months now, NFT technology has been gaining popularity, and we aim to put it at the service of both project owners and NFT holders.

Promote a project, finance it, hold shares in the name of the NFT holders linked to it, accompany it in its development, and reward the NFT holders on the result achieved.

HOW THE PROCESS WORKS

FEES

Refunds and fees

On each transaction, meta-fund.io acquires a 10% fee, whether it be for the payment of project funds or for the payment of dividends.

These fees contribute to the financing of the projects and guarantee the sustainability of the platform.

THE AREAS OF FINANCING

01

Gaming

Highlighting of innovative video game projects, in the blockchain sector or not.

02

Technology

Promotion of technological development projects for end-users or companies

03

Metaverse

Promotion of projects oriented towards the metaverse, allowing simplification of its access or use,

04

Progress

Promotion of innovation projects enabling progress in the fields of ecology, energy, transport, industry, health and cultural preservation.

IRL* VISION / VIRTUAL VISION

From virtual reality à to reality

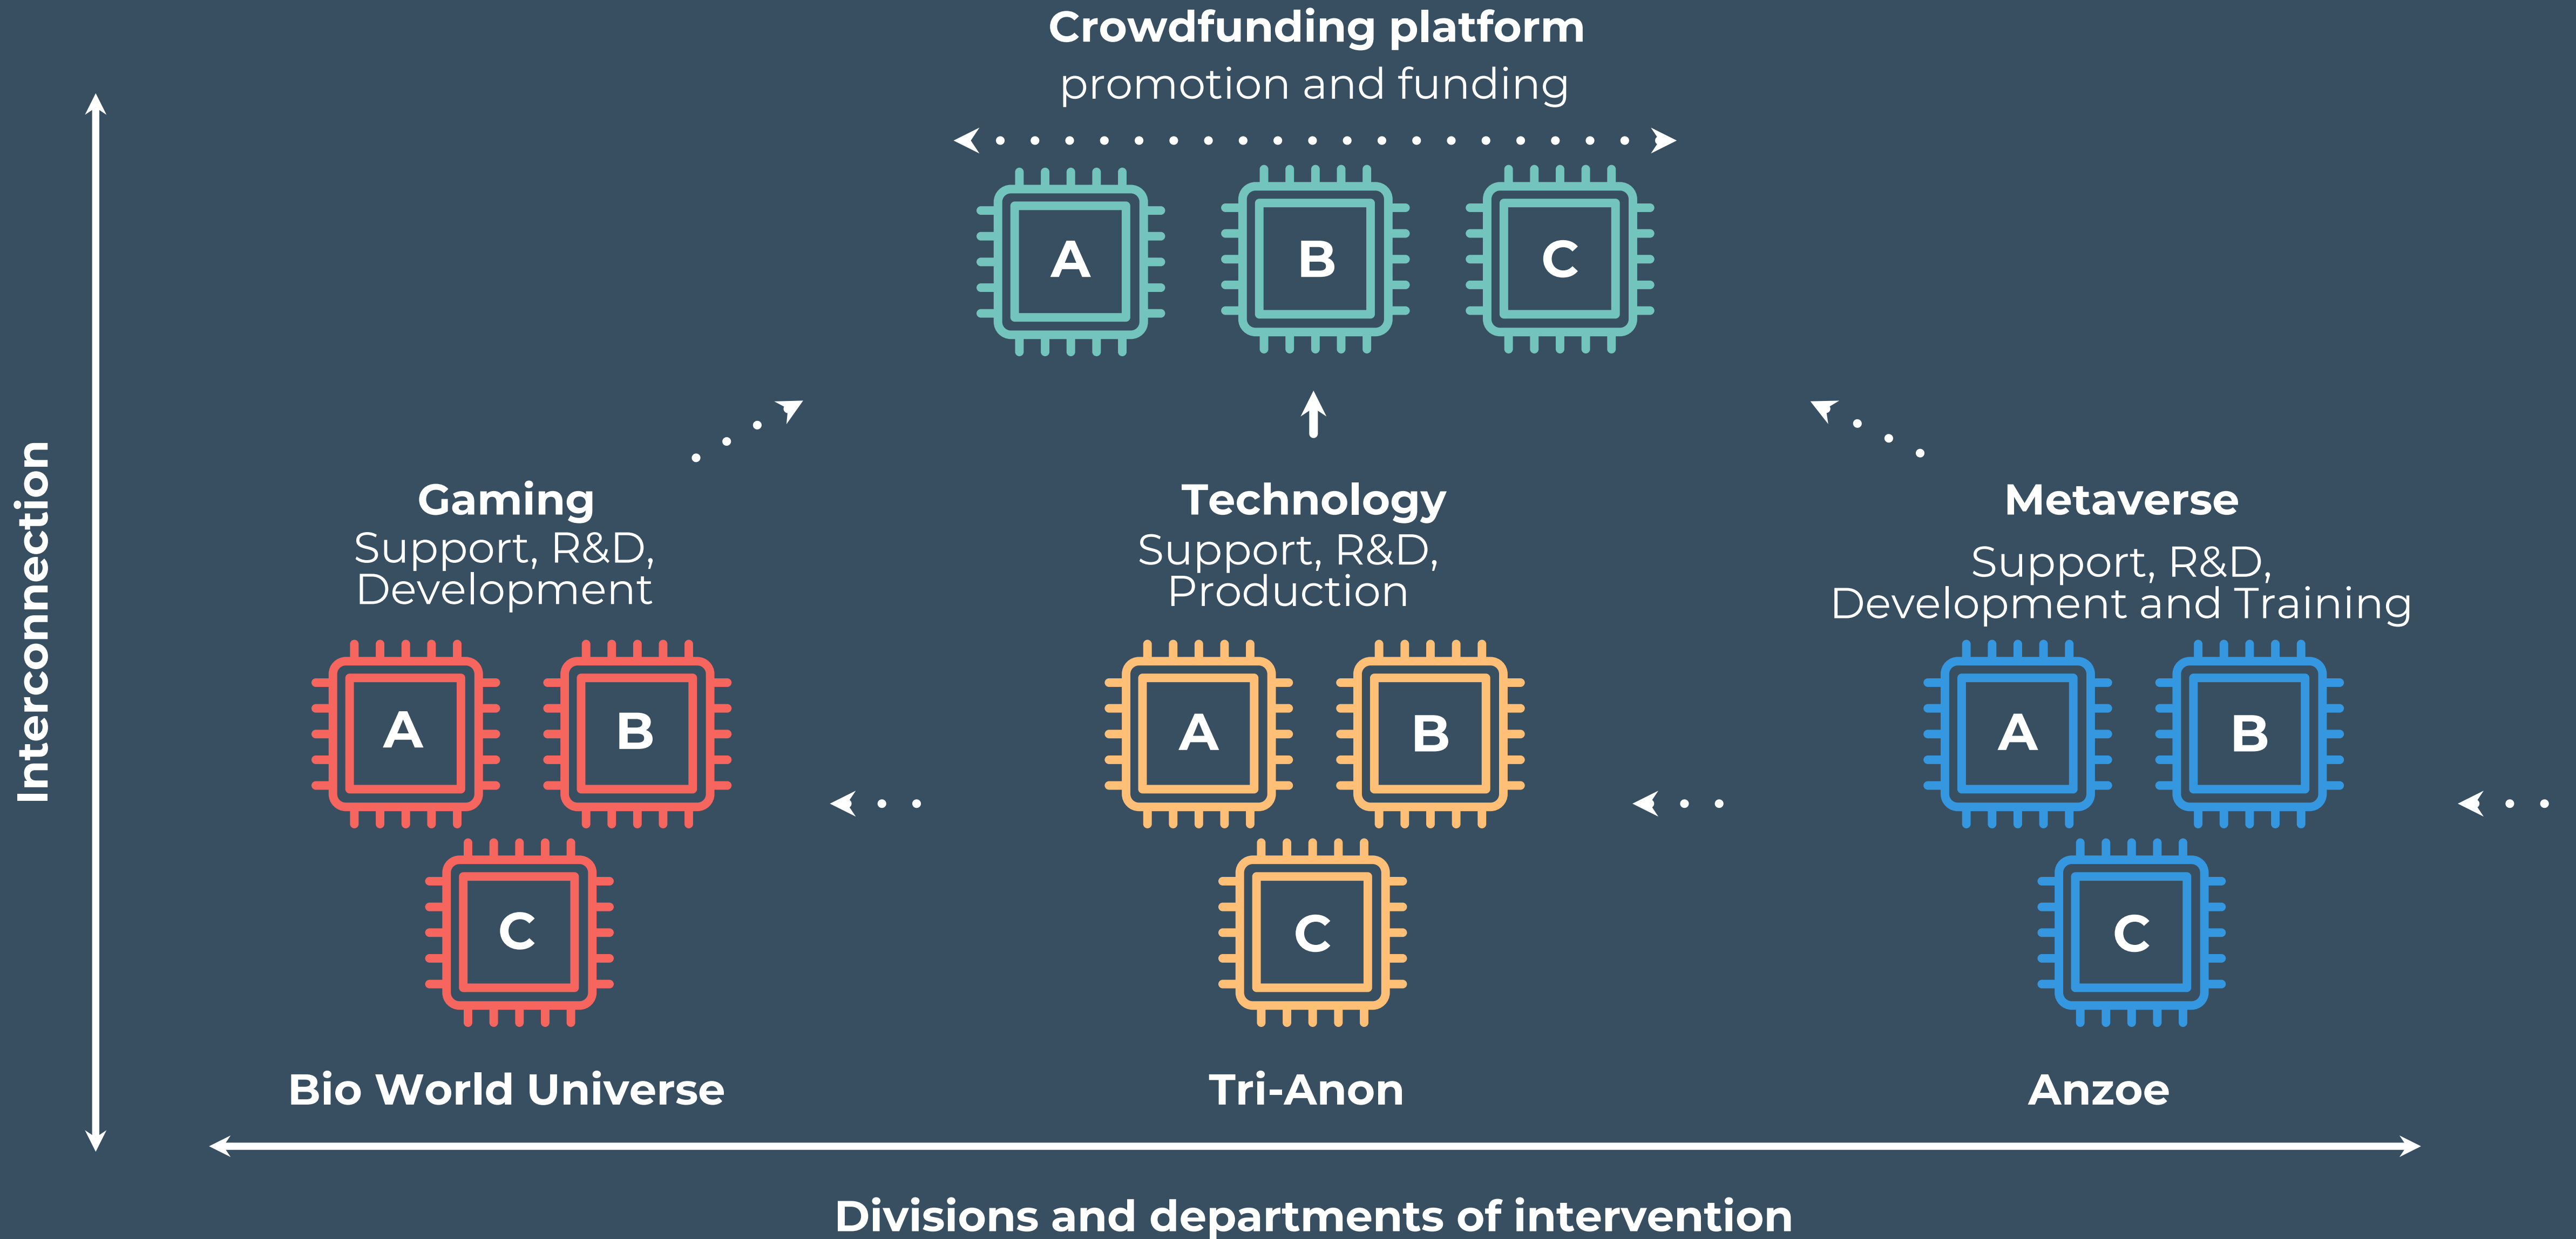

Our ambition is to develop several departments in the year 2022: Gaming Department, Technology Department. Metaverse Department. The mission of these departments is to promote our projects, but also to develop our own projects, in particular through an R&D department in partnership with one of the largest game publishers in order to facilitate the use of these technologies for companies and individuals IRL.

* IRL : In Real Life

OUR STRATEGY

GUARANTEES

To be a guarantor of the projects

Our teams will be made up of project managers with a speciality in each field, and will be accompanied by a financial expert as well as a legal specialist to validate the compliance and the realisation of each project.

By acquiring a share of the company or the finance project, we guarantee its sustainability and the transparency of the results for the holders of NFTs as well as the community

DIVIDENDS & BENEFITS

KYC*

legal obligation

In order to meet the legal requirements of the different countries, we set up a KYC* to validate the identity of the holders of the NFTs of the different collections, when they wish to recover the dividends and various bonuses inherent to the project.

It is possible to hold, resell or purchase NFTs from our collections without validating a KYC*, but it will be necessary to do so in order to receive the bonuses and dividends.

* KYC : Know Your Customer, Connaissez vos clients. Processus permettant de lutter contre le financement du terrorisme et le blanchiement d'argent.

OUR ORGANISATION

Startup, with an evolutionary horizon

We are a startup whose fundraising will be done through the NFT market. We have chosen the Solana blockchain to initiate our project, but with a multi-blockchain horizon.

The company statutes will be published in the first quarter of 2022 in order to guarantee transparency on our developments and actions.

We have chosen the SAS form to guarantee a sustainable evolution of the company.

meta-fund.io

OUR ROADMAP

Q4 2021

Creation

Creation of the structure, sale of the first NFTs, deployment of our communication plan, and start of recruitment

Platform

Deployment of the platform, start of the marketing plan, expansion of the teams, publication of partnerships

Q1 2022

PARTNERS

en cours

OU SOMMES NOUS ?

At the centre of Europe, in France

We are located in Strasbourg, in the heart of Europe. However, we will be working on all continents and positions will be available internationally.

We are located near Epic Games' Twinmotion studio. Is this a coincidence?
